

GFP Declaration

To our future partners in the world.

We promise to contribute to the world's food industry as a member involved in the agriculture, forestry, fisheries, and food industries, to deliver excellent Japanese products throughout the world.

Pursuit the best quality.

Prepare for the food safety.

And always keep in mind to respect nature.

All GFP members are challengers.

We help each other and grow together.

We will contribute to the agriculture, forestry, fisheries and food industries to support 10 billion people instead of 100 million people.
